- Coordinated with external company to monitor and support data integration to the company's Online Provider Directory Enterprise System.
- Worked with complex datasets and trained new hires to work with them as well.

IT Manager, The Ministry of Agriculture, Livestock and Marine, Libya

Benghazi-libya

May 2007 - Dec 2012

In this position, I worked at the ministry's marine unit, where I managed and supervised teams in charge of designing and implementing human resources, training and protection systems.

An important duty was managing the protection system that is designated to the issuance of licenses for fishing vessels, and the generation of stats reports about the amounts of fish and to track the economical growth of fishing. The main purpose of the protection system was to control the quantity of fish exports, and to protect breeds that are at risk of extinction. Systems were developed using a variety of applications including VB, Delphi, Excel and SQL.

Team Lead, The Ministry of Agriculture, Livestock and Marine, Libya

Benghazi-Libya

Jul 2003 - May 2007

In this position, I joined the management team to work as a team lead, where I supervised the development of a system for the ministry projects from A-Z. The system managed the ministry projects and produced periodic reports for the management, and was developed using VB.net and SQL.
